

QUALITY POLICY

EIL is committed to provide timely, cost effective and value added services and products to its customers in compliance with applicable codes, standards, procedures, engineering practices, statutory and regulatory requirements and established Quality Management System.

EIL aims for continual improvement of its technology offerings, systems and work processes considering customer requirements and through regular feedback from stakeholders including its committed and motivated employees.

EIL would continuously enhance customer satisfaction and meet customer expectation by providing high quality of services and products during each phase of design and delivery across its areas of operations.
