INDUSTRY TECHNICAL TRAINING CALENDAR

JAN. 2022 - MAR. 2022

Engineers India Limited (EIL)

Engineers India Limited a Navratna PSU, under the Ministry of Petroleum and Natural Gas, Government of India established in 1965, is India's leading engineering consultancy organization with over 55 years of rich expertise in providing EPC Services focused on the Oil and Gas and Petrochemical Industries. The Company has also diversified into sectors like Infrastructure, Water and Waste Management, Solar and Nuclear Power and Fertilizers to leverage its strong technical competencies and track records.

Over the years, EIL has emerged as a "Total Solution" Engineering Consultancy Company in India providing design, engineering, procurement, construction, execution and integrated project management services from "Concept to Commissioning" with highest quality and Safety Standards, to several reputed National and International Clients. It also provides specialist services such as Heat and Mass Transfer Equipment design, Environmental Engineering, Specialist Materials and Maintenance Services (SMMS) and Plant Operations and Safety.

EIL is continuously striving to provide the highest quality of services to its Client through its dedicated team of human resources who strive to improve upon the systems and processes and benchmark them with the best of the technical knowledge available in the world. This has contributed to EIL's exceptional knowledge & expertise in several of the highly specialized technical areas both in innovation of indigenous technology developments as well as premium services.

Training Infrastructure

EIL's Employee Value Proposition (EVP) is "Delivering Excellence through People". EIL strongly believes that growth of its people contributes to the growth of the Company. Being a talent driven and knowledge based consultancy organization, it is important for EIL to enhance the capabilities of its human capital by increasing competency to maximize contribution towards achievement of organizational objectives. Engineers India Limited has its fully-equipped State of the Art Training Centre at its 34 Acres Office Complex located at Gurugram, Haryana. The Training & Development Centre, ensconced in the green habitat has two (02) large lecture Halls with seating capacity of 25-30 participants each, three (03) small Classrooms

with seating capacity of 15-20 participants each, a large Computer Lab having 20 PCs and a 120 seater Auditorium. The in-house catering services and accommodation facilities are an added advantage to facilitate residential programmes. The idyllic ambience at the Training Centre has been custom made to provide an engaging and enriching experience for the participants, which is also in strict adherence to COVID protocols. In view of the current scenario, encouraging more and more online interventions modern technologies are available to support learning through the virtual medium.

In continuation of EIL's efforts to provide innovative ideas to our esteemed Clients, EIL Training & Development Division has been organizing industry technical training programs for various national and international clients in Oil & Gas, Hydrocarbon, Fertilizer sectors providing conceptual knowledge and industry specific solutions.

These courses are designed in collaboration with the client organization and cover multiple functional areas of Oil & Gas Sector. Industry technical training programs are typically designed for engineers at junior, middle and senior level(s) to help in their overall professional development. The technical training programmes are conducted with the support of faculty having exceptional technical knowledge and vast experience in the industry in both Online/ Offline Mode.

The Industry Technical training programs help participants to understand the concept, both theoretically and practically through presentations, audio-visual aids, hands-on exercises & real time case studies. The training content design aspects are based on National/ International standards/ codes of practices. The Industry Technical training programs helps to make informed decisions to prevent and handle the encountered problems during day to day operations.

Special Discount on the Programme fees is offered to organizations, sending atleast 4 nominations, in any training programme.

S.No.	Program Title	Tentative Dates
1	Safety Integrity Evaluation through SIL/LOPA Technique	5-6 January, 2022
2	Design of Fixed Offshore Platforms	19 January, 2022
3	Overview of Basic Thermodynamics and CPP configuration	25 January, 2022
4	Energy Optimization Studies & Implementation in existing Refineries/ Petrochemical plants	9 February, 2022
5	Qualifications of Manual welding Procedures & Welders and Review of WPS /PQRs according to ASME Section IX"	18 February, 2022
6	Application of Primavera Software to real world Mega Projects	25 February, 2022
7	Fundamentals of Effluent Treatment Plant Design, Effluent Recycle & Zero Liquid Discharge Plant Design	2-3 March, 2022
8	Inspection of Site Fabricated Critical Equipments	11 March, 2022
9	Fundamentals of Risk Analysis (HAZAN, RRA & QRA)	22 March, 2022
10	Project Management : Planning for Mega Projects and their Execution	29 March, 2022

Respective programme brochures will be published closer to the programme dates, giving details of course coverage and target audience.

To nominate kindly fill in the attached Nomination Format and send us a week before the training programme:
